Electronic Submission of Adverse Inspection Reports (AIRs) to the HSE

SAFed have been working closely with the Operational Support Manager of the HSE Field Operations Directorate Divisional Support Team for some 12 months on a project to provide a digitalised means of submitting Adverse Inspection Reports (AIRs).

This project is now in its final stages, with internal communications and feedback at the HSE expected to conclude by late January 2022 / early February, and the system then going live during late February / early March.

We will continue to keep you updated as these final stages progress. In the meantime if you have comments or queries please do not hesitate to contact me.
